OFFICIAL ASSESSMENT REPORT - CONFIDENTIAL

AI CANDIDATE ASSESSMENT

Candidate Name:	Rishi Kesava Gudipati
Interview Date:	March 26, 2026
Interview Time:	11:37 AM
Total Questions:	19
Coding Problems:	2
Coding Correct:	0/2
Assessment Status:	NOT RECOMMENDED
Overall Performance Score:	2.0/10

EXECUTIVE SUMMARY

HIRING DECISION: NOT RECOMMENDED (TECH GAPS)

Rishi Kesava Gudipati scored 20/100, showing some strengths in intro and project-related questions, but struggled with technical and soft skills. Hiring is not recommended at this time due to significant gaps in key areas.

KEY IMPROVEMENTS	RECOMMENDED NEXT STEPS
• Develop stronger technical skills, particularly in areas like cross-browser compatibility and system architecture • Improve responses to behavioral and scenario-based questions to demonstrate adaptability, teamwork, and leadership skills • Enhance problem-solving abilities, especially in coding challenges • Work on providing more detailed and specific examples from past experiences	• Take online courses or attend workshops to improve technical skills, such as those offered by Udemy or Coursera • Practice responding to behavioral and scenario-based questions using resources like Glassdoor or Pramp • Participate in coding challenges on platforms like HackerRank or LeetCode to improve problem-solving skills • Seek feedback from mentors or peers on areas for improvement and create a plan to address them

PERFORMANCE SCORECARD

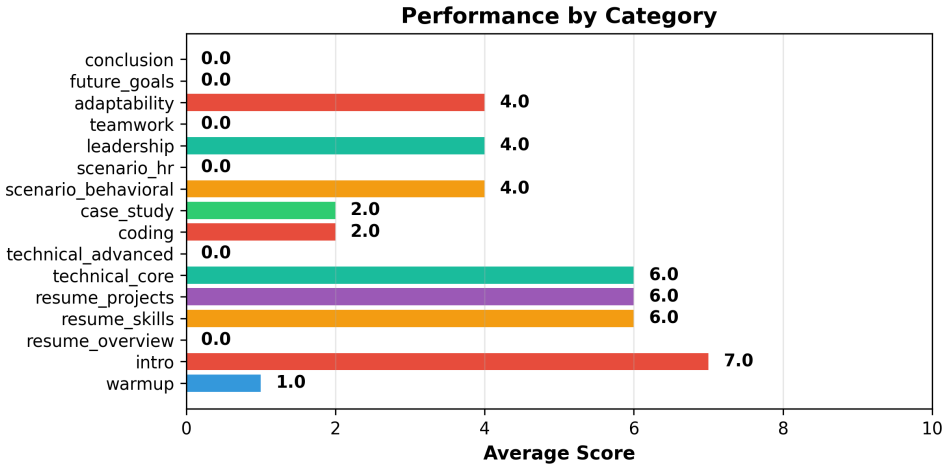
2.0	2.3	1.8	98%
OVERALL PERFORMANCE	TECH ACCURACY	COMM. SCORE	TRUST ASST.

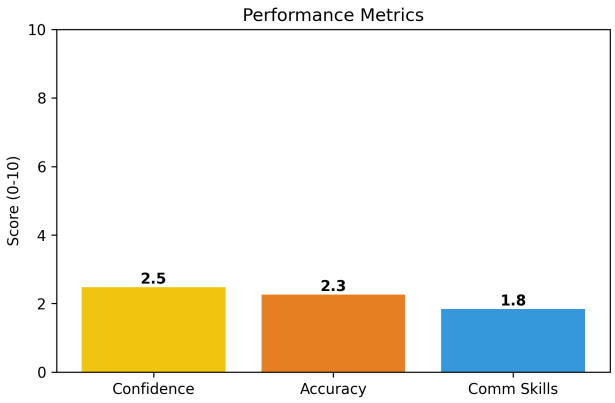
TECHNICAL SKILLS ANALYSIS

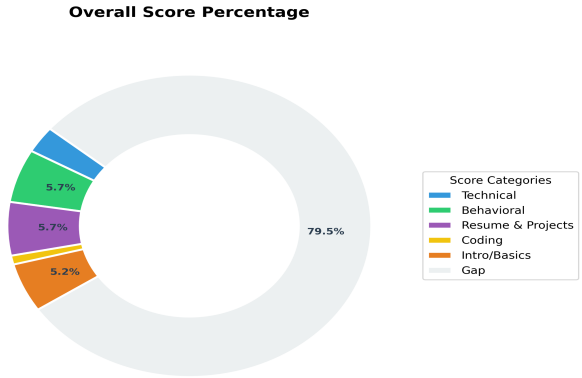
SKILL DOMAIN	SCORE	ASSESSMENT	JUSTIFICATION
Technical Accuracy	2.3/10	AVERAGE	Response correctness across all modules.
Coding Proficiency	0.0/10	CRITICAL	Test cases and logic complexity.
Speech & Formulation	1.8/10	SUPPORT NEEDED	Verbal clarity and structural delivery.

SKILLS ASSESSMENT (BY MODULE)

Skill Area	Average Score	Assessment	Justification
Self-Introduction	**3.0/10**	**Critical**	**Failed to answer fundamental questions.**
Project	**0.0/10**	**Not Attempted**	**Candidate did not reach this stage.**
Internship	**0.0/10**	**Not Attempted**	**Candidate did not reach this stage.**
Technical	**2.0/10**	**Critical**	**Failed to answer fundamental questions.**
Coding	**0.0/10**	**Critical**	**Failed to answer fundamental questions.**
HR/Behavioral	**0.0/10**	**Critical**	**Failed to answer fundamental questions.**







STRENGTHS & WEAKNESSES ANALYSIS

STRONG IN:	WEAK IN:
• No specific strong areas identified yet.	• Warmup (Avg: 1.0/10) • Resume Overview (Avg: 0.0/10) • Technical Advanced (Avg: 0.0/10) • Coding (Avg: 2.0/10) • Case Study (Avg: 2.0/10)

INTERACTION LOG & TRANSCRIPTS

ROUND 1 | WARMUP

INTERVIEWER: Hello Rishi Kesava Gudipati, welcome to the interview, how are you doing today?

CANDIDATE RESPONSE:

-1

JUSTIFICATION: The candidate did not provide a response to the question, making it impossible to assess their technical strength or knowledge.

SCORE: 0/10

ROUND 2 | WARMUP

INTERVIEWER: Moving on, how has your day been so far?

CANDIDATE RESPONSE:

Everything is going fine.

JUSTIFICATION: The candidate's response does not demonstrate any technical knowledge or relevance to the field. However, they provided a clear and concise answer to the question. To improve, the candidate should strive to incorporate technical concepts and terminology into their responses, even in casual conversations.

SCORE: 2/10

ROUND 3 | INTRO

INTERVIEWER: That sounds fine, now can you tell me a little about yourself?

CANDIDATE RESPONSE:

Right now I am pursuing my Mtech and I have completed my Btech in weekends university with a good score and I have some technical skills of like front and back time during that and my final year I have performed some projects like some. And also some other products based on the front end development like national pooling systems and currently on working on a private using a generative models.

JUSTIFICATION: The candidate demonstrates a good understanding of technical concepts, including front-end and back-end development, and has experience with projects and products. They also mention working with generative models, which shows they are familiar with current technologies. However, the answer could be more detailed and structured, and the candidate could provide more specific examples of their skills and experiences.

SCORE: 7/10

ROUND 4 | RESUME_OVERVIEW

INTERVIEWER: Moving on, please introduce yourself.

CANDIDATE RESPONSE:

On please introduce yourself.

JUSTIFICATION: The candidate failed to provide a meaningful introduction, instead repeating the prompt. To improve, they should provide a brief overview of their background, experience, and relevant skills.

SCORE: 0/10

ROUND 5 | RESUME_SKILLS

INTERVIEWER: Moving on, how would you ensure the security and integrity of user data in your Online National Polling project?

CANDIDATE RESPONSE:

based on the http and htts programming using some get operations in the front end and back end using php security systems

JUSTIFICATION: The candidate demonstrates a basic understanding of security concepts, mentioning HTTP and HTTPS, which is a good start. However, the answer lacks depth and specificity, particularly in terms of how PHP security systems would be implemented to ensure user data integrity. The mention of 'get operations' in the front end and back end is somewhat relevant but lacks clarity. To strengthen the answer, the candidate could have discussed specific security measures such as encryption, secure authentication protocols, and data validation.

SCORE: 6/10

ROUND 6 | RESUME_PROJECTS

INTERVIEWER: That sounds interesting. Moving on, how would you implement a real-time notification system in your Automated Slot Controlling System to alert drivers when a parking slot becomes available?

CANDIDATE RESPONSE:

So I have used Arduino. I know when its comes to for notification system we need to use a WiFi module which help us to send a user notification based on the cloud services with the. Can connect this slot system to the module and send some notifications to the operations when the lorry driver enter to the. Slot. If it is available he gets some message. If it is not available he gets sometimes via the notification systems.

JUSTIFICATION: The candidate demonstrates a good understanding of the technical components involved in implementing a real-time notification system, such as using a WiFi module and cloud services. However, the answer lacks specificity and clarity in terms of the overall system architecture and the exact technologies that would be used. With more detailed explanations and examples, the candidate could provide a more comprehensive solution.

SCORE: 6/10

ROUND 7 | TECHNICAL_CORE

INTERVIEWER: Moving on, how would you design the user interface for the EMOJIFY application to enable users to easily create and customize their own emojis?

CANDIDATE RESPONSE:

Moving on, how would you design the user interface for the Imagify application to enable users to easily create and customize their own emojis? Currently we haven't implemented any user interface for this model. We just trained the model and tested in based on the real time detection using their open CV libraries which help us to identify the emotion of the module and back end. I mean like sideway we have created some few emojis based on the emotions like anger means it shows the anger image, it is sad means it shows the sad images and related. Emotion it displays the image but we have the user interface not designed.

JUSTIFICATION: The candidate demonstrates a good understanding of the task, recognizing the need for a user interface to create and customize emojis. They also show knowledge of using OpenCV libraries for real-time emotion detection. However, the answer lacks specificity and clarity on the design of the user interface. With more details on the implementation and user experience, the answer could be stronger.

SCORE: 6/10

ROUND 8 | TECHNICAL_ADVANCED

INTERVIEWER: That sounds interesting. How would you handle cross-browser compatibility issues in web development projects?

CANDIDATE RESPONSE:

Okay, I have no idea about this cross browser compatibility.

JUSTIFICATION: The candidate appears to lack knowledge and experience in handling cross-browser compatibility issues, which is a crucial aspect of web development. It would be beneficial for them to study and practice techniques for ensuring cross-browser compatibility, such as using CSS prefixes, testing on multiple browsers, and utilizing libraries or frameworks that provide built-in support for cross-browser compatibility.

SCORE: 0/10

ROUND 9 | CODING

INTERVIEWER: Moving on, how would you design a scalable system architecture for a high-traffic e-commerce website.

CANDIDATE RESPONSE:

Moving on, how would you design a scalable system architecture for a high traffic e commerce website? Based on the brand width of the. Website and based on the customization for the.

JUSTIFICATION: The candidate seems to be repeating the question and does not provide a clear answer. To improve, they should focus on providing a concise and well-structured response that addresses the key components of a scalable system architecture, such as load balancing, caching, and database design. They should also consider discussing the importance of scalability, reliability, and performance in an e-commerce website.

SCORE: 2/10

ROUND 10 | CASE_STUDY

INTERVIEWER: Let's transition to the coding round. Please check the editor for your first challenge. Good luck!

CANDIDATE RESPONSE:

Solution received. Here is your next problem. Question mark.

JUSTIFICATION: The candidate seems to have misunderstood the instruction, as they were asked to complete a coding challenge but instead mentioned receiving a solution and presenting a new problem. However, they did acknowledge the transition to the coding round, showing some awareness of the task at hand. To improve, the candidate should focus on following instructions accurately and demonstrating their coding skills.

SCORE: 2/10

ROUND 11 | SCENARIO_BEHAVIORAL

INTERVIEWER: Moving on, how would you design a system to handle millions of users for a social media platform.

CANDIDATE RESPONSE:

Moving on, how would you design a system to handle millions of users for a social media platform? and i end pain the algorithm of the social media and posting some reels which engages the customers or viewers which help us to get millions of users via social media

JUSTIFICATION: The candidate seems to understand the importance of engagement in a social media platform, but their answer lacks depth and technical details. They mention 'algorithm' and 'posting reels', which shows some knowledge of social media concepts. However, they do not provide a clear design for handling millions of users, such as scalability, architecture, or infrastructure. With more technical details and a clearer thought process, their answer could be more effective.

SCORE: 4/10

ROUND 12 | SCENARIO_HR

INTERVIEWER: Moving on, can you describe a situation where you had to adapt to a significant change in a project's requirements or timeline?

CANDIDATE RESPONSE:

Moving on, can you describe a situation where you had to adapt to a significant change in a project 's requirements or timeline?

JUSTIFICATION: The candidate failed to provide a meaningful response, instead repeating the question. To improve, they should focus on providing specific examples from their experience, highlighting their ability to adapt to changes in project requirements or timelines, and demonstrating their problem-solving skills.

SCORE: 0/10

ROUND 13 | LEADERSHIP

INTERVIEWER: Moving on, can you describe a time when you had to meet a tight deadline in a project, and how you managed to deliver the results on time?

CANDIDATE RESPONSE:

So uh, I schedule the work uh task to be done on the my project to complete on the based on the deadline. Based on the task assigned to my teamworks, it will be submitted to every.

JUSTIFICATION: The candidate attempts to address the question but struggles to provide a clear, detailed example of meeting a tight deadline. They mention scheduling work and task assignment, indicating some awareness of project management basics. However, the response lacks specificity and does not fully articulate how they managed to deliver results on time. With more detail and clarity, the candidate could demonstrate stronger project management skills and a better ability to work under deadline pressure.

SCORE: 4/10

ROUND 14 | TEAMWORK

INTERVIEWER: Moving on, can you describe a time when you mentored a team member to help them improve their skills and achieve a specific goal?

CANDIDATE RESPONSE:

-1

JUSTIFICATION: The candidate did not provide a response to the question, making it impossible to assess their technical strength or mentoring experience. To improve, the candidate should provide specific examples of times when they mentored a team member, including the skills they helped improve and the goals that were achieved.

SCORE: 0/10

ROUND 15 | ADAPTABILITY

INTERVIEWER: Moving on, can you describe a situation where you worked collaboratively with a team to achieve a significant success?

CANDIDATE RESPONSE:

Members where it help me a lot in our connecting the signals and for the connections which give me significant success in the.

JUSTIFICATION: The candidate seems to be attempting to describe a collaborative team experience, but the details are vague and lack specific technical keywords. However, they mention 'connecting the signals' which could imply some understanding of system integration or communication. To improve, the candidate should focus on providing concrete examples and technical terms to demonstrate their knowledge and experience.

SCORE: 4/10

ROUND 16 | FUTURE_GOALS

INTERVIEWER: Moving on, can you give an example of a time when you had to learn a new tool or technology to complete a project, and how you adapted to it?

CANDIDATE RESPONSE:

-1

JUSTIFICATION: The candidate did not provide a response to the question, making it impossible to assess their technical strength or ability to learn new tools or technologies. To improve, the candidate should provide specific examples from their experience, highlighting the challenges they faced and how they overcame them.

SCORE: 0/10

ROUND 17 | CONCLUSION

INTERVIEWER: Moving on, what are your long-term career aspirations and how do you see yourself making a real-world impact in your chosen field?

CANDIDATE RESPONSE:

-1

JUSTIFICATION: The candidate's answer is incomplete and does not provide any information about their long-term career aspirations or how they plan to make a real-world impact in their chosen field. To improve, the candidate should provide specific examples of their career goals and how their skills and experience align with those goals.

SCORE: 0/10

ROUND 18 | CONCLUSION

INTERVIEWER: Moving on, thank you for participating, we will evaluate your responses.

CANDIDATE RESPONSE:

Moving on. Thank you for participating. We will evaluate your responses.

JUSTIFICATION: The candidate's response appears to be a repetition of the question, indicating a lack of understanding or engagement with the prompt. To improve, the candidate should strive to provide original and relevant answers that demonstrate their technical knowledge and skills.

SCORE: 0/10

ROUND 19 | CONCLUSION

INTERVIEWER: Moving on, thank you for participating, we will evaluate your responses.

CANDIDATE RESPONSE:

Moving on. Thank you for participating. We will evaluate your responses.

JUSTIFICATION: The candidate's response is a direct repetition of the question, indicating a lack of understanding or engagement with the topic. To improve, the candidate should strive to provide original and relevant answers that demonstrate their technical knowledge and skills.

SCORE: 0/10

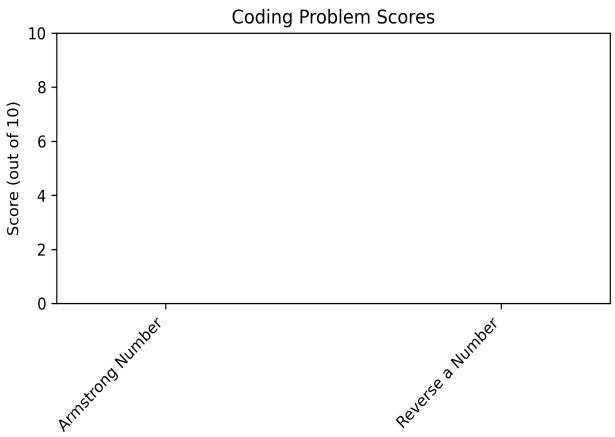
COMMUNICATION & GRAMMAR ANALYSIS

Analysis of Grammatical Accuracy and Fluency:

- None applicable, as there was no technical statement made.
- Lack of technical keywords and self-introduction content.

• Lack of clarity on how PHP security systems are used, vague mention of 'get operations' without context.
• Lack of clear system architecture, unclear notification system implementation details.
• Statement of having no idea about cross-browser compatibility

Coding Performance Analysis



FINAL RECOMMENDATION

Executive Summary:

Rishi Kesava Gudipati scored 20/100, showing weaknesses in technical and soft skills. Despite some strengths, the overall performance was below expectations. Hiring is not recommended at this time.

Areas for Improvement:

- Enhance problem-solving skills, particularly in coding and system design
- Develop stronger communication skills to effectively convey ideas and experiences
- Improve adaptability and ability to handle unexpected questions or scenarios
- Focus on cross-browser compatibility and security measures in web development projects

Remarks & Next Steps:

- Take online courses or attend workshops to improve coding skills and system design
- Practice whiteboarding exercises to enhance problem-solving and communication skills
- Review and work on projects that emphasize security, scalability, and cross-browser compatibility
- Seek feedback from mentors or peers to identify areas for improvement and track progress
